Healthcare Systems Engineering
UNIVERSITY OF WISCONSIN–MADISON

[Videos and Speakers' Slides from 2018 WIHSE Conference Now Available](#)

Thank you for joining us at the WIHSE conference to identify the challenges and opportunities to achieving smart and connected health care. In attendance were 142 speakers, faculty, researchers and students from the University of Wisconsin-Madison, UW Health, stakeholder groups and industry. To watch your favorite session again, or share the conference with a colleague, see the videos and slide decks on our [event page](#). We are planning events for the coming year and our conference in 2019, so stay tuned!

Congratulations to the Students of the QSI Lab Graduating

Since becoming a WIHSE affiliate and moving to their new offices in the Engineering Centers Building, the QSI Lab students have been working with WIHSE Associate Director and QSI Lab Director Oguz Alagoz to apply systems engineering tools and training at UW Health. We would like to congratulate the two project assistants of the lab, Madeline Ford and John Sandgren, on their graduations with their Master's degree this May. We would also like to send our best wishes to five other graduating students of the lab--Bridget Roehrs, Lauren Kuzminski, Maren Anderson, Adam Schmidt and Rachel Zenker. The QSI Lab presented their work at the WIHSE Conference Poster Session on May 2 and the QSI Lab Project Poster Presentation on May 10.

Madeline Ford (center) presenting the poster 'Improving Transition of Pediatric to Adult Care' at the WIHSE Conference.

John Sandgren (second from right) presenting the poster 'Neurosurgery Operating Room Traffic Study' at the WIHSE Conference.

Keep in touch with WIHSE!
